

FOI322 - request for data on patients that have received treatment for OCD

This report covers the calendar years 2016 to 2020.

Break down by hub of BHM referrals with a presenting complaint* of OCD, who attended at least 2 treatment contacts with an intervention of CBT.

Year	Hub			Total Referrals
	BHM - Central	BHM - North	BHM - South	
2016	35	43	49	127
2017	44	71	46	161
2018	39	62	56	157
2019	37	42	34	113
2020	38	48	39	125

* Presenting complaint is not a diagnosis

Break down by hub of referrals to BHM where referral source is CMHT and there is an open OCD diagnosis at the time of the BHM referral.

Year	Hub			Total Referrals
	BHM - Central	BHM - North	BHM - South	
2016	0	0	0	0
2017	0	1	0	1
2018	1	5	0	6
2019	0	0	0	0
2020	1	3	1	5

Break down by hub of referrals to SPS where referral source is CMHT and there is an open OCD diagnosis at the time of the SPS referral.

Year	Hub					Total Referrals
	East	North	Solihull	South	West	
2016	2	0	1	1	0	4
2017	3	1	1	2	0	7
2018	0	0	0	1	0	1
2019	1	1	0	1	2	5
2020	0	1	0	1	0	2

Break down by hub of patients with an attended CMHT contact with activity code indicating CBT took place at the contact, who have an open OCD diagnosis at the time of the contact.

Year	Hub					Total Referrals
	East	North	Solihull	South	West	
2016	13	7	11	11	7	49
2017	7	10	8	9	8	42
2018	13	14	8	7	8	50
2019	14	7	8	9	5	43
2020	7	6	7	8	4	32
