

FOI 0321/2022 Response

Request

The number of prisoners at the prisons this trust works with, who were diagnosed with:

- A learning disability WHILST in UK prisons in 2020 and 2021
- A learning difficulty WHILST in UK prisons in 2020 and 2021
- Of these, a breakdown of the number with ADHD and the number with Autism.

Moreover:

- The number of UK prisons associated with this trust, with less than 15 inmates currently diagnosed with a learning disability
- The number of UK prisons associated with this trust, with less than 15 inmates currently diagnosed with a learning difficulty

Response

The number of prisoners who were in prison and had been diagnosed with a learning disability or learning difficulty in 2020 is 25 prisoners, 3 with Autism & 13 with ADHD.

Please note that for the remaining 9 prisoners, HMP Birmingham's system does not hold the specific type of disability.

The number of prisoners who were in prison and had been diagnosed with a learning disability or learning difficulty in 2021 – 30 Prisoners, 1 with Autism & 19 with ADHD.

Please note that for the remaining 10 prisoners, HMP Birmingham's system does not hold the specific type of disability.

The number of UK Prisons associated with the Trust is one (1) Prison – HMP Birmingham.
