

## **FOI285 Response**

### **Request**

Can you please supply the following information?

- Are pagers and/or beeps used for communication within your Trust?
- Approximately how many pagers and beeps does the Trust use?
- Who currently supplies the pager and critical beep solutions in the Trust?
- What are the pager and beep contract renewal dates?

### **Response**

The Trust has the following types of pagers used for communication:

- Long range pagers which run over a network like a mobile phone.
  - Currently the Trust has five (5) long range pagers.
  - Obtained from PageOne Communications Ltd.
  - There is no contract renewal date as the pagers were procured on a 12-month rental via a framework.
- Internal paging systems within some of our sites
  - The Trust is unable to provide any information in relation to Internal pagers. This is because the requested information has not been captured within our systems.
