

FOI 0134/2022 Response

Request

I am doing some research regarding quality assurance software systems, used by nursing teams for auditing and accreditation in your Trust. Examples of the audits would be - safeguarding audits, falls audits, weekly audits, and ward accreditation. I would be grateful if you could, under the Freedom of Information Legislation, provide the following information relating to the mentioned software:

1. What is the current supplier name?
2. What are the contract dates (start and termination date)?
3. Which procurement route/framework/DPS was used to purchase the system?
4. How many staff use the system?
5. How much was invested in the system?

Response

The Trust does not have any quality assurance software systems purchased for clinical audits.

However, we do have systems for managing audit registration and monitoring which are internally built and owned (free).
