

**FOI 0237\_2022**

**NOTE:**

*For the questions below, we have provided a response for general Eating Disorders rather than specifically to Anorexia and Bulimia.*

*This is because we would likely be under representing the demand on our services, since there is a proportion of people open to the Specialised Community Eating service.*

**A. Adult eating disorders services:**

**1. Does your Trust provide a service to adults with anorexia nervosa\* or bulimia nervosa\*?**

Yes

**2. How many adults with anorexia nervosa\* or bulimia nervosa\* were on the Trust caseload at 31st March 2022?**

520

Not restricted to the ED Teams, but a count of distinct patients 18 years or older at time of referral who either:

- are on the caseload of the specialist adult ED community secondary care Teams at month end

OR

- are open elsewhere across the Trust's Secondary Care Services but not the ED Teams, with an active Eating Disorders ICD-10 diagnosis at month end

**3. How many adults with anorexia nervosa\* or bulimia nervosa\* were referred to the service over the 1 year period (1st April 21- 31st March 22)?**

540

Based on count of distinct referrals where the person is over 18 years at the point of referral and:

- referred to the specialised ED adult community Teams

OR

- referred to wider Secondary Care within the Trust and received an ICD-10 diagnosis within that year

**4. How many registered dietitians (in WTE/ FTE) were working exclusively with this caseload to adults with anorexia nervosa\* or bulimia nervosa\* at 31st March 2022?**

1 staff at 1.00 WTE but with time split across inpatients, day patients and outpatients

**5. What percentage of adults with anorexia nervosa\* or bulimia nervosa\* received into the service were seen by a dietitian over the 1 year period (1st April 21- 31st March 22)?**

27%

Based on the referrals received in the FY 21/22 provided in response to Q5 but the first contact with the dietitian is not restricted to that FY as referrals received later in the period would not have had an opportunity to be seen by the end of the FY

**B. Adolescent/ child eating disorder services**

**6. Does your Trust provide a service to adolescents/ children with anorexia nervosa\* or bulimia nervosa\*? YES**

Yes

**7. How many adolescents/ children with anorexia nervosa\* or bulimia nervosa\* were on the Trust caseload at 31st March 2022?**

88

Not restricted to the ED Teams, but a count of distinct patients 18 years or younger at the point of referral who either:

- are on the caseload of the specialist adult ED community secondary care Teams at month end

OR

- are open elsewhere across the Trust's Secondary Care Services but not the ED Teams, with an active Eating Disorders ICD-10 diagnosis at month end

**8. How many adolescents/ children with anorexia nervosa\* or bulimia nervosa\* were referred to the service over the 1 year period (1st April 21- 31st March 22)?**

105

Based on count of distinct referrals where the person is 18 years or younger and:

- referred to the specialised ED adult community Teams

OR

- referred to wider Secondary Care within the Trust and received an ICD-10 diagnosis within that year

**9. How many registered dietitians (in WTE/ FTE) were working exclusively with this caseload to adolescents/ children with anorexia nervosa\* or bulimia nervosa\* at 31st March 2022?**

1 staff at 1.00 WTE

**10. What percentage of adolescents/ children with anorexia nervosa\* or bulimia nervosa\* received into the service were seen by a dietitian over the 1 year period (1st April 21- 31st March 22)?**

63%

Based on the referrals received in the FY 21/22 provided in response to Q5 but the first contact with the dietitian is not restricted to that FY as referrals received later in the period would not have had an opportunity to be seen by the end of the FY
