

## **FOI 0263/2023 Response**

### **Request**

The total number of deaths considered more likely than not to have occurred due to problems in care in the trust for each quarter for which records are available for 2017/2018 to current

### **Response**

There are currently 39 deaths within 6 months of discharge from the Trust that are considered to have been avoidable between April 2017 – December 2022.

The following categories from the avoidability scale were used to determine this figure;

- Score 1: Definitely avoidable
- Score 2: Strong evidence of avoidability
- Score 3: Probably avoidable (more than 50:50)

Please note that in addition to the figure above some deaths are still being reviewed and have yet to receive an avoidability score.
