

FOI 052/2023

On the first day of each month between 1st November 2018 - 1st November 2022, how many people were on the waiting list for the following:

For CYPMHS a psychiatrist may diagnosis in some cases or the CYP may be considered as being 'emerging' in a particular area of need, but the model of care used focuses on needs rather than diagnosis, so it is the assessment rather than the diagnosis that is critical
A small number of our adult services have a strong diagnostic component, but in most cases the emphasis is on assessing needs and providing care to meet those needs, so care can start following initial assessment and a formal diagnosis may not be appropriate or follow at a later date

Q1. Diagnosis from your NHS Children and Young People's Mental Health Services (CYPMHS)?
Calculated as wait time from referral to first assessment contact (as start of diagnostic assessment)

Q2. Treatment from your NHS Children and Young People's Mental Health Services (CYPMHS)?
Calculated as wait time from first contact (as end of wait time for diagnostic assessment) to second contact (as proxy for start of treatment)

Q3. Diagnosis from your NHS Adult Mental Health Services?
Refers to all adult services delivered in a community setting, including NHS Talking Therapies. To ensure cohort included in response to Q3 is the same as that for Q4 - please see further explanation against Q4
Calculated as wait time from referral to first assessment contact (as start of diagnostic assessment)

Q4. Treatment from your NHS Adult Mental Health Services? From your NHS Adult Mental Health Services?
Refers to all adult services delivered in a community setting, including NHS Talking Therapies, as anyone waiting for inpatient admission receives alternative support from community services at the same time
Calculated as wait time from first contact (as end of wait time for diagnostic assessment) to second contact (as proxy for start of treatment)

Please note for context that the combined case load for these services rose over this period from around 38,000 in Nov 2018 to around 46,000 in Nov 2022

Please note for context that the combined case load for these services rose over this period from around 38,000 in Nov 2018 to around 46,000 in Nov 2022
