

## FOI 0311/2023 Response

### System definitions:

**Outpatient e-prescribing** - Advanced e-prescribing in use across wards for outpatient care, incorporating specialist prescribing and (ideally) clinical decision support, integrated as part of end-to-end medicines management. This possibly offers the single biggest opportunity for improving patient safety through digitalisation.

**Inpatient e-prescribing** - Advanced e-prescribing in use across wards for inpatient care, incorporating specialist prescribing and (ideally) clinical decision support, integrated as part of end-to-end medicines management. This possibly offers the single biggest opportunity for improving patient safety through digitalisation.

**Order Communications** - Electronic ordering communications systems (OCS) are computer applications used to enter diagnostic and therapeutic patient care orders, for example laboratory test requests or prescriptions, and to view test results. The primary aim of the system is to remove most of the current paper-based process for requesting laboratory investigations and for receiving results.

**Pharmacy** - Pharmacy orders and stock control is managed electronically.

**Critical care** - A critical care information system for Intensive Care Units and high acuity care that enables clinicians to manage critical workflow and care plans for patients.

Please enter 'No System Installed' or 'No Department' under supplier name if your trust does not use the system or have the department:

### System type – Outpatient e-prescribing

- **Supplier name**
  - EMIS Health Secondary Care
- **System name**
  - EPMA
- **Date installed**
  - March 2015
- **Contract expiration**
  - March 2023
- **Is this contract annually renewed?**
  - No

- **Do you currently have plans to replace this system?**

- No

- **Procurement framework**

- SBS Framework

- **Other systems it integrates with?**

- Rio from The Access Group

- **Total value of contract (£)**

- £126,038.40

**Notes - e.g. we are currently out to tender**

- N/A

**System name - Inpatient e-prescribing**

- **Supplier name**
