## FOI 0374 2024 Response

I am trying to understand the medications and provision of mental health services that is taking place in the UK. Specifically, can you inform me of the following for the financial year 2023/2024:

1. Tetrabenazine usage. I am trying to determine the disease areas for the usage of Tetrabenazine.

Therefore, where possible to split the usage between the following disease areas:

Disease	Patient Numbers on Tetrabenazine	Percentage of patients on Tetrabenazine
Huntington's Disease		
Tardive Dyskinesia	8	73%
Parkinson's disease	1	9%
Medication induced Dystonia		

<sup>\*\*</sup>Note: A total of 11 patients were prescribed Tetrabenazine in 2023/24. Of these, 2 patients had no reference made to the conditions listed above.

- 2. I am also trying to define the treatment sites for mental health provision within both the hospital and community settings, e.g.
- a. Hospital A, Address 1, Address 2, Town, County, Postcode
- b. Hospital B, Address 1, Address 2, Town, County, Postcode
- c. Clinic Y, Address 1, Address 2, Town, County, Postcode

Please refer to the link below which notes all Trust sites.
