

FOI 0472_2025 Response

Please provide data from calendar year January – December 2021, 2022, 2023, 2024,

- 1. How many service users classed as being a “sufficient risk to self or others” were admitted into your care.**

Please see the table below and note:

- Admitted taken to mean referred to community services due to later questions pertaining to contacts
- Risk to self and others has been determined from completed risk assessment forms within 6 months of referral
- For all responses, the count of admissions does not include those already open to other services within the Trust.
- For Q1-3 reporting year reflects year of referral received.

Year	Q1 *
2021	2633
2022	2292
2023	3040
2024	4444

- 2. How many of those service users classed as being a “sufficient risk to self or others” were referred to your service from police?**

Please see the table below and note:

- Risk to self and others has been determined from completed risk assessment forms within 6 months of referral
- For all responses, the count of admissions does not include those already open to other services within the Trust.
- For Q1-3 reporting year reflects year of referral received.

Year	Q2
2021	203
2022	116
2023	66
2024	155

3. Of those service users classed as being a “sufficient risk to self or others” how many were classed as DNA or non-engagement service users?

Please see the table below and note:

- Service Users classed as DNA or non-engagement based on history of non-engagement question in the risk assessment that has been completed within 6 months of referral.
- Risk to self and others has been determined from completed risk assessment forms within 6 months of referral
- For all responses, the count of admissions does not include those already open to other services within the Trust.
- For Q1-3 reporting year reflects year of referral received.

Year	Q3
2021	545
2022	509
2023	706
2024	1194

4. Of those service users classed as being a “sufficient risk to self or others” how many were discharged?

Please note the following points:

- Risk to self and others has been determined from completed risk assessment forms within 6 months of referral
- For all responses, the count of admissions does not include those already open to other services within the Trust.
- For Q4 reporting year reflects year of discharge rather than referral

Year	Q4
2021	2465
2022	2337
2023	2633
2024	3185

5. Of those service users classed as being a “sufficient risk to self or others” and also classed as DNA or non-engagement service users:

a) How many were referred back to their GP after missing 1 appointment?

Please note the following points:

- DNA or non-engagement has been determined by Patient discharged having missed 1 appointment and having attended 0 appointments.
- Patient or Trust cancellations are not considered.

Year	Q5a
2021	10
2022	10
2023	6
2024	12

b) How many were referred back to their GP without a Care Co-Ordination review meeting?

The Trust is unable to provide a response.

This is because review meetings are not recorded in a way we can report on.

c) How many were referred for a further assessment under the Mental Health Act 1983?

Please note the following points

- Data is based on recording of MHA assessment as a contact during the period of the referral in question.
- Data will not include those assessments conducted by external staff, where BSMHFT staff not present

Year	Q5c
2021	12
2022	20
2023	16
2024	39

d) How many have not had contact with your trust either directly or via their GP?

Please note the following points

- Data includes patients not attended a contact and not yet discharged,
- Data includes patients who have been offered but DNA or cancelled
- The Trust cannot confirm whether the patient had contact with their GP .
- For 2024, 82 reflects current wait lists. 17 of these patients have an upcoming scheduled appointment

Year	Q5d
2021	0
2022	2
2023	1
2024	82
