

FOI 0480 2025 Response

- Q1

Total number of referrals made for an ADHD assessment in your trust per year, broken down by age group (children 0-12, adolescents 13-18, adults).
- Q2

Total number of ADHD assessments completed in your trust per year, broken down by age group (children 0-12, adolescents 13-18, adults).
- Q3

Total number of individuals diagnosed with ADHD in your trust per year, broken down by age group (children 0-12, adolescents 13-18, adults).

Please see the table below and note:  
year reflects when that decision was made/activity occurred with each group not being a subset of the previous

age bands reflect the age the person was at the point of the decisions/activities occurred

For 2021, the increased diagnosis rates are due to the discovery of a data inputting issue that resulted in a delay of the diagnosis being recorded on the electronic patient system, which has since been resolved. This did not impact on patient care as the delay was restricted to recording on the electronic system and did not affect clinical practice.

The Trust's CAMHS Service do not carry out ADHD assessments

Year	Q1 Referrals	Q2 Assessments	Q3 Diagnosed
2020	550	82	14
0-17	1	0	0
18+	549	82	14
2021	1220	266	634
0-17	25	0	0
18+	1195	266	634
2022	2367	601	286
0-17	43	0	0
18+	2324	601	286
2023	4113	798	323
0-17	60	0	0
18+	4053	798	323
2024	4727	653	221
0-17	43	1	1
18+	4684	652	220
